DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 47-51, drawn to a plurality of sensors spaced along the width of the sheet for detecting a leading edge of a sheet material, classified in class 83, subclass 364.
 - II. Claims 58-63, drawn to a transfer mechanism, classified in class 83, subclass 649.
 - III. Claims 52-56, drawn to a measurement device, classified in class 83, subclass 72.
 - IV. Claim 57, drawn to a controller and feeder for advancing and retracting the sheet at variable lengths, classified in class 83, subclass 367.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions of groups I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the sensor for detecting a leading edge of a sheet material of group I could be used without the transfer mechanism of group II, and conversely, the transfer mechanism of group II could be used without the sensor for detecting a leading edge of a sheet material of group I. See MPEP § 806.05(d).
2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Christopher L. McKee on 9/28/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Omar Flores-Sánchez whose telephone number is 703-308-0167. The examiner can normally be reached on 8:00-5:00.
